**The Birds We Live With** Catherine E. Clark, 2009 In a remarkably fresh, sometimes humorous style, wildlife artist Catherine Clark captures the birds around us in her art. These are the avian creatures that populate our backyards, forests, and seashores, from coast to coast, bringing colour and beauty into our lives. The artwork, reproduced in full-colour, shows her keen eye, skilled hand, and deep love of the natural world. Over 200 drawings and paintings are accompanied by observations about the birds and their habits, as well as reflections on the process of creating the paintings. The images represent the artist's choice of her favourites among the hundreds she has created to illustrate articles on birds and wildlife. They demonstrate not only her unique artistic viewpoint, but commitment to the care and preservation of the world around her. They will bring enjoyment to the reader while inspiring them to take a look out their windows, to stroll in a field, wander in the woods, and, perhaps, to take some small action to save what they see.

Quantum Physics in Minutes Gemma Lavender,2017-06-06 Quantum physics is the most fundamental -- but also the most baffling -- branch of science. Allowing for dead-and-alive cats, teleportation, antimatter, and parallel universes, as well as underpinning all of our digital technology, it's as important as it is mind-bending. This clear and compact book demystifies the strange and beautiful quantum world, and hence the nature of reality itself. Contents include: Schrodinger's cat, inside the atom, the particle zoo, the Higgs boson, Heisenberg's uncertainty principle, God playing dice, relativity, the Big Bang, dark energy and matter, black holes, the fate of the Universe, the Theory of Everything, quantum gravity, string theory, the multiverse, instant communication, quantum computing and cryptography, superconductivity, quantum biology, quantum consciousness, and much more. Written as a series of mini essays with 200 simple diagrams to help understanding, there can be no easier guide to this notoriously confusing subject. At last it's possible for non-specialists to understand quantum theory and its central role in the birth of the universe and the very existence of life.

**Leaving the Atocha Station** Ben Lerner,2011-08-23 Adam Gordon is a brilliant, if highly unreliable, young American poet on a prestigious fellowship in Madrid, struggling to establish his sense of self and his relationship to art. What is actual when our experiences are mediated by language, technology, medication, and the arts? Is poetry an essential art form, or merely a screen for the reader's projections? Instead of following the dictates of his fellowship, Adam's research becomes a meditation on the possibility of the genuine in the arts and beyond: are his relationships with the people he meets in Spain as fraudulent as he fears his poems are? A witness to the 2004 Madrid train bombings and their aftermath, does he participate in historic events or merely watch them pass him by? In prose that veers between the comic and tragic, the self-contemptuous and the inspired, *Leaving the Atocha Station* is a portrait of the artist as a young man in an age of Google

searches, pharmaceuticals, and spectacle. Born in Topeka, Kansas, in 1979, Ben Lerner is the author of three books of poetry *The Lichtenberg Figures*, *Angle of Yaw*, and *Mean Free Path*. He has been a finalist for the National Book Award and the Northern California Book Award, a Fulbright Scholar in Spain, and the recipient of a 2010-2011 Howard Foundation Fellowship. In 2011 he became the first American to win the Preis der Stadt Münster für Internationale Poesie. *Leaving the Atocha Station* is his first novel.

*Ladies in the Laboratory? American and British Women in Science, 1800-1900* Mary R.S. Creese, 2000-01-01 A systematic survey and comparison of the work of 19th-century American and British women in scientific research, this book covers the

two countries in which women of the period were most active in scientific work and examines all the fields in which they were engaged. The field-by-field examination brings out patterns and concentrations in women's research (in both countries) and allows a systematic comparison of the two national groups. Through this comparison, new insights are provided into how the national patterns developed and what they meant, in terms of both the process of women's entry into research and the contributions they made there. *Ladies in the Laboratory?* features a specialized bibliography of nineteenth century research journal publications by women, created from the London Royal Society's Catalogue of Scientific Papers, 1800-1900. In addition, 23 illustrations present in condensed form information about American and British women's scientific publications throughout the nineteenth century. This well-organized blend of individual life stories and quantitative information presents a great deal of new data and field-by-field analysis; its broad and methodical coverage will make it a basic work for everyone interested in the story of women's participation in nineteenth century science.

*American Buffalo* Steven Rinella, 2008-12-02 From the host of the Travel Channel's "The Wild Within." A hunt for the American buffalo—an adventurous, fascinating examination of an animal that has haunted the American imagination. In 2005, Steven Rinella won a lottery permit to hunt for a wild buffalo, or American bison, in the Alaskan wilderness. Despite the odds—there's only a 2 percent chance of drawing the permit, and fewer than 20 percent of those hunters are successful—Rinella managed to kill a buffalo on a snow-covered mountainside and then raft the meat back to civilization while being trailed by grizzly bears and suffering from hypothermia. Throughout these adventures, Rinella found himself contemplating his own place among the 14,000 years' worth of buffalo hunters in North America, as well as the buffalo's place in the American experience. At the time of the Revolutionary War, North America was home to approximately 40 million buffalo, the largest herd of big mammals on the planet, but by the mid-1890s only a few hundred remained. Now that the buffalo is on the verge of a dramatic ecological recovery across the West, Americans are faced with the challenge of how, and if, we can dare to share our land with a beast that is the embodiment of the American wilderness. *American Buffalo* is a narrative tale of Rinella's hunt. But beyond that, it is the story of the many ways in which the buffalo has shaped our national identity. Rinella takes us across the continent in search of the buffalo's past, present, and future: to the Bering Land Bridge, where scientists search for buffalo bones amid artifacts of the New World's earliest human inhabitants; to buffalo jumps where Native Americans once ran buffalo over cliffs by the thousands; to the Detroit Carbon works, a "bone charcoal" plant that made fortunes in the late 1800s by turning millions of tons of buffalo bones into bone meal, black dye, and fine china; and even to an abattoir turned fashion mecca in Manhattan's Meatpacking District, where a depressed buffalo named Black Diamond met his fate after serving as the model for the American nickel. Rinella's erudition and exuberance, combined with

his gift for storytelling, make him the perfect guide for a book that combines outdoor adventure with a quirky blend of facts and observations about history, biology, and the natural world. Both a captivating narrative and a book of environmental and historical significance, *American Buffalo* tells us as much about ourselves as Americans as it does about the creature who perhaps best of all embodies the American ethos.

*Dragonfly in Amber* Diana Gabaldon,2010-12-17 From the author of *Outlander*, a magnificent epic that once again sweeps us back in time to the drama and passion of 18th-century Scotland. For twenty years Claire Randall has kept her secrets. But now she is returning with her grown daughter to Scotland's majestic mist-shrouded hills. Here Claire plans to reveal a truth as stunning as the events that gave it birth: about the mystery of an ancient circle of standing stones, about a love that transcends the boundaries of time and about James Fraser, a Scottish warrior whose gallantry once drew a young Claire from the security of her century to the dangers of his. Now a legacy of blood and desire will test her beautiful copper-haired daughter, Brianna, as Claire's spellbinding journey of self-discovery continues in the intrigue-ridden Paris court of Charles Stuart, in a race to thwart a doomed Highlands uprising and in a desperate fight to save both the child and the man she loves.
